

Inaugural Conference of the  
European Achondroplasia Forum

# Advances in Achondroplasia 2023

21–22 April 2023, Frankfurt

It is an exciting time in the management of achondroplasia, and the European Achondroplasia Forum (EAF) is delighted to introduce the first conference dedicated to the **multidisciplinary care** of achondroplasia – Advances in Achondroplasia.

This hybrid CME congress will cover key areas of clinical management of achondroplasia including implementation of recommendations, **advances in therapeutics**, abstracts, and case studies of care.

As a company at the forefront of driving excellence in achondroplasia care we are asking for your support through sponsorship to make this congress an exceptional multidisciplinary educational event.

The **1.5-day conference** features a full scientific programme, developed by the Co-Chairs and EAF Steering Committee and builds on the success of previous work undertaken by the EAF in delivering and disseminating best practice guidance, and driving improvements in patient care. There will be opportunities for you to **engage with renowned leaders** in the achondroplasia community, and the option for a symposium. This is an exciting chance to be involved in advancing the field, demonstrating your commitment to achondroplasia care.

We need your support to make this an exceptional event where all disciplines and patient groups can come together to **make a real difference to patient care**.

We sincerely hope you will consider sponsoring this important initiative. Please contact [congress@achondroplasiaforum.com](mailto:congress@achondroplasiaforum.com) for more information. We look forward to meeting in Frankfurt.

Best regards,
